

# Good Bye Laf

Amine Bello Garba

# My first day at school

- I almost spend all of my life at the Lycée La Fontaine of Niamey, this school saw me grew up. I can remember of my first day in this school, It was in Grande Section and my teacher was Mister Alain Vollet, I was a Little shy this day because i was not knowing nobody but when I arrived Mister Alain directly try to make me feel comfortable by presenting me to class and by presenting me to the other Childrens. Since that day it makes almost 13 years that I am here and unfortunatly the school will be shutdown next year.

# My favorite moments

- I spend very good moments in this school since i am here for example with all the fairs that happened every years where it was my best Saturday morning in every school years , I also lived the 50th anniversary of the school in 2012 the schools administration invited everybody to a dinner at school i can remember that it was a good night and every spend a good time. I will also remember of the sport tournament that the CVL organise before almost every holidays, i played sometimes or i just come to watch but it was very good every time.
- But i will specially remember about the school trip that we have done in february 2023, we go to morocco with the terminale and première HGGSP classes, all of the trip was incredible and i am considering it as the best trip of my life.

The teachers  
that i will  
especially  
remember

- I will especially remember about the history and geography teachers Who are Mr.Kossou ,Mr Bertho and Mr Ali yero and made me like this subject with very interesting and funny classes they also make me live one of the best trip of my life.
- There is also the P.E teachers Who are mr. Amada, Mr. Vivier and mr. Maucci. They made me suffer sometimes in Option P.E or in the P.E class but it was also very good moments , because of them i discover many sports and techniques that will serve me later.
- But I would like to thanks all of the teachers that help me to get where i am now.

# My difficulties and projects

- This year was a very difficult year Because it is not easy to Learn normally at home especially in Niger because of the bad connection and with the hope that the school will open in the year. At distance it feels like it missing something like the contact with the people etc, but we all face the problem together and now it's the end of this difficult year.
- For the next chapter of my life who is the university i would like to do a AES licence or a Political Sciences licence in France.

THANKS !

- I would like to thanks all of the school staff who make my school years inforgetable, unfortunatly the school will not open the next year also but I am sure that in few years the Lycée La Fontaine of Niamey will come back with all of the staff and it will be able the carry its normal activities.
